

product information sheet

Augasorb Genet

The newly created Augasorb Genet flavour and fragrance ingredient has been produced by a novel extraction method, isolating the definitive suite of aromatic components from *Spartium junceum*, whilst retaining an aroma true to the original material; without the need of traditional methods of production that utilise hazardous or expensive solvents.

This ingredient imparts a strong 'brown-like' flavour, suitable for use in flavours such as cocoa, chocolate, maple, vanilla, tobacco, honey or butterscotch; and an odour much the same, which is commonly used for its sweetness.

Botanical Source:
Spartium junceum – flowers

CAS:
90131-21-8

FEMA:
2505

Recommended Dosage:
7 ppm
