

product information sheet

Augasorb Parsley Leaf

The newly created Augasorb Parsley Leaf flavour and fragrance ingredient has been produced by a novel extraction method, isolating the definitive suite of aromatic components from *Petroselinum sativum*, whilst retaining an aroma true to the original material; without the need of traditional methods of production that utilise hazardous or expensive solvents.

This ingredient is ideal for use in many flavour complexes, particularly those requiring a fresh green top note, such as spice or vegetable flavour formulations. In fragrances, it can easily be used for its fresh green top note, or sweet spicy herbaceous character

Botanical Source:
Petroselinum sativum –
Leaves

CAS:
84012-33-9

FEMA:
2837

Recommended dosage:
1000 ppm
