

Augustus Oils Ltd

General Product List

Augustus Oils Ltd - in harmony with nature - to present it at its best... . .

A wealth of experience and knowledge has allowed Augustus to bridge the gulf in expectation and trust between growers and users of natural ingredients.

The Company works in partnership with customers on the one hand, and growers, farmers and distillers on the other. Both users and producers can then focus on exactly what they do best, while skilled Augustus technicians closely monitor and control the delivered products. This ensures users can have the confidence that they will receive the best raw materials suited to their requirements.

Augustus has invested in modern, well equipped laboratories to provide unparalleled control of quality, and a development environment that continues to product innovative ranges of natural ingredients. Quality systems are fully in compliance with ISO9001 and GMP.

The strength of the company is built on both its comprehensive knowledge base, and extensive stocks of raw materials for both fragrance and flavour use.

To complement its range of conventional and Organic Essential Oils and Aroma Chemicals, Augustus also offers a steadily increasing range of its own, UK manufactured Natural Extracts, Absolutes, Resinoids and Natural Chemicals. These again are fully tested and certificated, and very tightly quality controlled.

Augustus is committed to promoting the use of natural ingredients wherever the potential lays, and to provide an environment of support and trust to both our customers and suppliers.

CONTENTS

ESSENTIAL OILS (and their derivative products)	4
- 100% Pure and Natural	
- Standardised	
- Commercial	
- Organic	
- Absolutes and Concretes	
AUGUSTUS SPECIALITY PRODUCTS (contact us for further information)	
- Augaflor Specialities	
- Augaherb oil and water soluble plant extracts	
- Augasorb alcohol free absolutes	
- Natural fragrance butters

NOTES

About Augustus...

A privately owned company formed in 1985, Augustus Oils Ltd has expanded steadily, opening into its first essential oil and fragrance chemical factory in 1986. The company moved to Bordon, Hampshire in 1994. Here facilities included substantial factory and storage areas, blending and processing plant together with extensive laboratories for research and development and quality assurance/control functions.

In October 2009 Augustus moved to its present, purpose built 3700sq/m unit in Alton, Hampshire, which has enabled the company to expand on all the above and allow production scale manufacture of naturals and Augustus speciality products.

Early 2017 saw the company granted full ISO9001 and GMP status.
